

● ABOUT ME

Passionate about full stack web development ,data development, and artificial intelligence. I build end-to-end solutions combining modern web technologies with data-driven insights and AI capabilities to meet current market demands. Through Enactus entrepreneurial projects and swimming coaching, I've developed strong skills in discipline, teamwork, and problem-solving that prepare me for today's tech industry.

● WORK EXPERIENCE

FINAL YEAR INTERNSHIP – ACCESS CONTENT AGENCY – 29/01/2025 – 31/05/2025 – LAC 2, TUNISIA

Development of a Platform for Analysis and Management of Collaborations between Advertisers and Content Creators

- Conducted requirements analysis and wrote the specifications document.
- Designed UML diagrams and performed system modeling.
- Applied Scrum methodology for agile project management.
- Developed the platform using the MERN stack (MongoDB, Express.js, React, Node.js) and implemented JWT tokens for user security.
- Created an automated scoring system leveraging data scraping (Instagram) and OpenAI GPT to analyze content and evaluate creators.

ADVANCED INTERNSHIP – SOROUBAT – 01/2024 – 02/2024 – MEGRINE, TUNISIA

Development of a Real Estate Management Application

- Collected requirements and prepared the specifications document.
- Designed UML diagrams and structured application functionalities.
- Deployed the application, conducted testing, and monitored maintenanc

SWIMMING COACH – CNBA – 11/2023 – Current – RADES, TUNISIA

Training Sessions Leadership and Coaching

- Planned and led training sessions tailored to different skill levels.
- Developed children's motor skills and self-confidence.
- Monitored progress and communicated regularly with parents.

SUMMER INTERNSHIP – SMARTITEK – 06/2023 – 08/2023 – TUNIS, TUNISIA

Development of a Stock Management Application

- Analyzed requirements and prepared the specifications document.
- Designed UML diagrams and performed system modeling.
- Deployed the application, conducted testing, and managed maintenance.

INTRODUCTORY INTERNSHIP – SOROUBAT – 01/2023 – 02/2023 – MEGRINE, TUNISIA

Internal Network Support and Troubleshooting

- Monitored and analyzed internal network operations.
- Performed maintenance and resolved technical network issues.

● EDUCATION AND TRAINING

2022 – 2025 Zaghouan, Tunisia

BACHELOR'S DEGREE IN COMPUTER SCIENCE AND TECHNOLOGY Higher Institute of Technological Studies of Zaghouan

2021 – 2022 Ben Arous, Tunisia

BACCALAUREATE DIPLOMA IN COMPUTER SCIENCE Ben Arous High School

● **SKILLS**

communication | interact verbally in English | entrepreneurship | give swimming lessons

Databases:

MongoDB | SQL

Frameworks et technologies:

HTML | CSS | react | Node.js | C | JAVA | Python | Angular | Symfony | PHP

Version Control & Modeling

Scrum | UML | GitHub | Git

● **SOCIAL AND POLITICAL ACTIVITIES**

10/2024 – 04/2025 Enactus Iset Zaghouan

Finance and Sponsorship Manage

As Finance and Sponsorship Manager, I was responsible for managing budgets, securing funding opportunities, and establishing partnerships with sponsors. I ensured that all necessary resources were available to support social entrepreneurship projects while maintaining efficient and effective financial management.

10/2023 – CURRENT Enactus Iset Zaghouan

Project Finance Manager

As the Project Finance Manager for Nopaleer, I oversaw budgeting, funding, and financial planning for the development of this sustainable cactus-based leather alternative. My work ensured the project had the necessary resources to progress efficiently, contributing to our team becoming finalists in the national Enactus competition.

● **PROJECTS**

Colab – Analysis and Management Platform for Advertiser-Content Creator Collaborations

As part of my final year project, I developed a platform designed to streamline collaborations between brands and content creators. I implemented an automated scoring system to evaluate creators using public Instagram data scraping, calculating a score based on quantitative criteria (such as audience size and engagement rate) and qualitative criteria (assessed with OpenAI GPT for content analysis). This scoring system accounted for approximately 60% of the project’s added value. The platform was developed using the MERN stack (MongoDB, Express.js, React, Node.js), and I ensured user security by implementing JWT tokens for authentication. Following the Scrum methodology, the work was organized into three four-week sprints, during which I actively contributed to the platform’s design, development, and integration.

Soroubat Real Estate Management System

Design and Development of a Custom Web Application for Real Estate Project Management

Developed a tailored web solution to streamline real estate project management and quotation tracking, fully aligned with specific submission requests.

The platform includes intuitive dashboards for project monitoring and document management, providing a clear and efficient overview of ongoing activities.

Technologies used: MongoDB, React, Node.js, Redux

The Parisian Makeup Store Management

Designed and developed a fully customized web platform tailored to the needs of a specialized retailer. The interface includes interactive dashboards that track sales and purchases in real time while providing comprehensive stock management tools.

Technologies used: MongoDB, React, Node.js, Redux

● **LANGUAGE SKILLS**

Native language(s): Arabic **Other language(s):** French, English
